DETAILED ACTION

1. Information Disclosure Statement filed on 7/2/04 has been received.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 8, 9, 12, 17-21, 24, 25, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Evans (U. S. Patent no. 5,549,181).

Evans discloses a caliper 20, friction pads 15,16, anchor bracket 12,13, spring 30 with a first portion 33 and a second portion 33 that yields with wear of the brake pad (see column 6 lines 63-67).

4. Claims 13-15 and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Aoyagi (U. S. Patent no. 6,269,915).

Aoyagi discloses a caliper 12, friction pads 22,26, anchor bracket 12, spring 30 with a portion spaced apart and at an angle to a surface of the brake pad (see figure 1b, portion 31c spaced apart)

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7, 11, 23, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans in view of Aoyagi.

Evans is relied upon as above. Evans does not disclose a portion of the spring spaced apart from a friction pad surface. Aoyagi teaches a portion of the spring spaced apart from a friction pad surface. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have a portion of the spring spaced apart from a friction pad surface as taught by Aoyagi in the device of Evans in order to allow some movement before the spring permanently deforms.
